

StoSil In

Creating healthy interiors

StoSil In is an innovative paint that helps to create attractive, healthier and more comfortable habitats.

Developed with the environmentally conscious customer in mind, StoSil In is made from silica sand, one of the world's most abundant natural resources. Resistant to mould and algae growth, StoSil In is also free of Volatile Organic Compounds, already exceeding the 2010 manufacturing legislation concerning VOCs.

StoSil In is hard-wearing, long lasting and highly breathable, with excellent moisture absorption properties.

Available as a matt finish in brilliant white or 465 natural earth tone colours.

StoSil In

Creating healthy interiors

For the discerning, environmentally conscious customer, Sto has created an innovative range of contemporary mineral-based paints with all of the environmental advantages of traditional paints, coupled with modern performance requirements.

Technical innovation for contemporary living

Recognising the potential health benefits of mineral-based paints, Sto have developed a whole new range of surface coatings to create technically superior products suitable for modern, contemporary living.

As well as being robust and very long lasting, StoSil In boasts a very high diffusion capability, allowing the coating to absorb high quantities of moisture with little or no interior condensation. The lack of surface moisture and high alkalinity of the paint, creates an environment which protects the interior from unsightly and unhealthy mould and algae growths.

In essence, StoSil In helps towards creating a more temperate environment to live in, as excess moisture is safely drawn into the surface and slowly re-released.

Ideal for:

- Traditional and contemporary interiors
- Restaurants
- Housing associations
- Hotels
- Schools and colleges
- Public buildings
- Showers and bathrooms
- Infrequently heated or poorly ventilated buildings

Art No.	Article	Packing Unit	Practical Consumption
00518-002	StoPrim Plex primer	20 ltr can	12-15 m ² / ltr
00206-006	StoSil In - white	15 ltr pail	10-12 m ² / ltr per coat
00206-044	StoSil in - tinted	15 ltr pail	10-12 m ² / ltr per coat

Nature Plus

Sto interior silicate products are amongst the most environmentally friendly products available on the market. Nature Plus, one of Europe's leading environmental organisations, has awarded StoSil In their 'Nature Plus' certification, after months of stringent product testing.

VOC Free in accordance with 2010 legislation

All interior paints from Sto are free of Volatile Organic Compounds (VOCs) which can have harmful effects on our breathing, as well as cause pungent odours during application. By the end of 2010, all paints sold within Europe will need to have minimal VOC content. For more information, contact Sto Ltd.

Application

- Fully prepare and clean substrate before coating.
- Prime the substrate with StoPrim Plex.
- Use at least 2 coats of StoSil In for the ideal finish.
- StoSil In is a water based paint, applied easily with paint brush or roller.
- Care must be taken to avoid contact with skin and eyes.
- Careful masking of metal frames, glass, etc. is essential.
